VOLTA

Water has always fascinated people. Now designer Yves Behar has created VOLTA. A washbasin made of Saphirkeramik, that presents water in the bathroom in a completely new way. To achieve this, he has radically questioned the traditional form of the washbasin.

saphirkeramik

Saphirkeramik

Saphirkeramik, patented and available on the market is one of the latest, globally significant innovation from LAUFEN. This revolutionary, ceramic material reaches its exceptional hardness blended with corundum, a colourless mineral, which is a component of sapphires. This gives Saphirkeramik a flexural strength equal to that of steel. Yet it has the potential to be wafer-thin, giving designers almost infinite freedom to experiment – and tear up the rulebook of bathroom design.
